Take control over your network

During this seminar you will get hands-on experience and knowledge of how to take control over the network. After the introduction, talk about how to identify what traffic flows through the network, how to decide what to do with the traffic, block unnecessary non business applications, block malware and add Quality of Service on applications.

Who should attend:
Consultants and pre-sale

Questions: lea.thejls@westcon.com
+45 (0)8827 6734

Agenda

11:00 Welcome & Background
