Palo Alto Networks GDPR seminar

During this seminar you will get hands-on experience and knowledge of GDPR. After the introduction, we learn about what impact GDPR will have on organizations. We continue talking about Palo Alto Networks Security Platforms: Which unique value can be offered to an organization, explicit and secure enablement of your applications within your organization, network, host and virtualized infrastructure and finally 360 degree visibility, how Palo Alto Networks enriches a SIEM solution.

Who should attend:
Sale and pre-sale
