Why Juniper Networks?

Juniper Networks Facts:

- The top global service providers, and 99 of the Fortune Global 100, run on Juniper Networks.
- More than 86 percent of smartphone traffic in the U.S. is secured by Juniper.
- Seven of the eight largest international stock exchanges trade across Juniper Networks.
- The top-five social media properties run on Juniper Networks, with more than 4.5 billion updates per day and 53,000+ updates per second.

Learn More

If you need a network that does more than simply connect users to services—and one that advances your business, streamlines your existing operations, and enables you to innovate and respond faster to changing customer needs—look to Juniper Networks. To learn more please call **+1-866-298-6428**.

When you're seeking the best network for your business, you need one that's simple, reliable and secure. That's why we recommend Juniper Networks.

Not only is Juniper powering the world's largest—most demanding—IT infrastructures, including the top global service providers, 99 of the Fortune 100, and the top-five social media platforms worldwide, it's also driven to create technology that's easy to use and manage.

No matter how large or how small your business, Juniper Networks has a solution designed to fit your needs now and then grow along with you.

Our team of network engineers has the expertise to assess your network requirements—and the experience necessary to help you design, integrate and manage a customized Juniper Networks solution that's uniquely optimized to meet your specific needs.

Your Network. Your Business.

Most small and midsize businesses can't afford to maintain a large full-time IT staff to handle network issues. That's why so many of them choose Juniper. Its networks are simple, reliable and secure. Our engineers can help you build and operate a network that minimizes risk and delivers results so your business can succeed today—and in the future.

Juniper Networks Junos, the common network operating system across all of Juniper's routing, switching and security products, is unmatched by competitors. Junos and JunosV platforms make customer networks simpler to maintain and operate over time.

The Juniper Difference: One OS

One OS: Simplicity	Open Standards	Reliability
• Single system, easy to deploy, learn and use • Creates lower TCO • Productivity gains	• Interoperates with competitors • Don't have to rip and replace to upgrade	• Reliable accessibility to applications and services
